

1. CAPITAL MANAGEMENT

Our Treasury function manages our capital at Group level and locally in each region. The allocation of financial resources, in general, and capital, in particular, favours business portfolios with the highest positive impact on the Group's profitability and shareholder value. As a result, Treasury periodically reallocates capital among business portfolios.

Regional capital plans covering the capital needs are presented to the Group Investment Committee. Local Asset and Liability Committees attend to those needs under the stewardship of regional Treasury teams. In developing, implementing and testing our capital and liquidity, we take legal and regulatory requirements into account.

The regulatory and economic capital demand is continuously monitored to adjust the available capital if required. Capital demand forecasts are regularly determined and carried forward based on the planned development of the business volume and results as well as expected risk parameter changes.

1.1 Capital-Assessment and Adequacy Basel III specific

1.1.1 Scope of Applications

The Pakistan Operations currently use Basel III framework for the Capital Assessment and Capital Adequacy purposes. Basel III Standardized Approach is used for calculating the Capital Adequacy for Credit and Market risk, whereas, Basic Indicator Approach (BIA) is used for Operational Risk Capital Adequacy purposes.

1.1.2 Capital Structure

The lead regulator, State Bank of Pakistan (SBP) sets and monitors capital requirements for the banks in Pakistan as a whole. With effect from 31 December 2013, the SBP has advised through its BPRD circular # 6 dated August 15, 2013 that all banks to calculate their capital requirements on Basel III Accord. The amendments have been introduced with an aim to further strengthen the existing capital related rules. Basel III instructions have become effective from 31 December, 2013, however, there was a transitional phase and complete requirements became applicable with full implementation by 31 December, 2019.

In implementing the current capital requirements, SBP requires the Pakistan Operations to maintain a prescribed total capital to total risk weighted assets ratio. As at the year end 2025, the SBP's minimum prescribed capital adequacy ratio is 12.5% (Total Capital 10% and Capital Conservation Buffer 2.5%). Further, under Basel III instructions, Banks are also required to maintain a Common Equity Tier 1 (CET1) ratio and Tier 1 ratio of 6% and 7.5% respectively as at 31 December 2025. the Pakistan Operations' ratio is compliant with this minimum benchmark.

The Pakistan Operations of Deutsche Bank calculate requirement for market risk on its portfolio based upon the methodology provided by SBP which takes account of specific and general market risk capital charge for interest rate risk using the maturity method.

Banking operations are categorized as either trading book or banking book, and risk-weighted assets are determined according to specified requirements that seek to reflect the varying levels of risk attached to assets and off-balance sheet exposures.

The Pakistan Operations' regulatory capital is analyzed into following tiers:

- Tier I capital: includes Head office capital account, and un-remitted profit.
- Tier II capital: includes general provision not kept against identified debts.

1.1.3 The leverage ratio of the Pakistan Operations as at 31 December 2025 is 19.42% (2024: 16.65%). The ratio has been computed as prescribed by State Bank of Pakistan through Instructions for Basel-III Implementation in Pakistan.

As on 31 December 2025; Total Tier 1 capital of the Bank amounts to Rs. 16,471 million (2024: Rs. 14,684 million); whereas, the total exposure measure amounts to Rs. 84,814 million (2024: Rs. 88,213 million).
